Q3 2023 AIDE MEMOIRE

A number of events in 2022 and Q3 2023 have an impact on the year-on-year comparison for Q3. These include the following items, which you may wish to consider in your modelling. Please note that the items listed below are not exhaustive and that other factors may affect the comparisons for Q3 2023 versus the same period last year.

FACTORS IMPACTING COMPARATIVE FIGURES

Western Europe

At the Q2 2023 conference call, we commented on the volume development:

“Volumes were impacted by the consumer sentiment and bad weather in early Q2...”

...and continued:

“Our mix was better than the category development observed in the markets where external data indicates that the high inflation is impacting consumer behavior, putting pressure on market volumes and in some markets also category and general mix.

At the Q2 2023 conference call we commented on the Q3 weather impact:

“With regards to July and the beginning of August, well the weather has continued to be pretty poor...”

Asia

In the Q2 2023 conference we commented on the trajectory in China:

“...what we see in the second half in China is a continuation of our growth there. We reiterate the expected revenue growth of mid-single digit to high-single digit. Over time, our market share strengthens, our big cities are developing well. Yes, we had a COVID impact in Q4, but all – that is also the smallest part of the year...”

Costs

In the Q2 2023 conference call we commented on H2 2023 costs:

“In half two, COGS are expected to continue to increase, both compared to half one and year-on-year. Even so, the group has the capacity to invest in future growth. Consequently, we will increase investment levels in key brands and capabilities.”
OUTLOOK

In the Q2 2023 announcement we stated:

On 15 August, we upgraded our earnings expectations for 2023. The upgrade was due to the continued solid business performance year to date and based on our expectations for the remainder of the year:

• Organic growth in operating profit of +4% to +7%.

Based on the spot rates at 14 August, we assume a translation impact on operating profit of around DKK - 900m for 2023.

Other relevant assumptions are:

• Financial expenses, excluding foreign exchange losses or gains, are expected to be around DKK 700m.
• Reported effective tax rate of around 21%.
• Capital expenditure at constant currencies of around DKK 5.0bn.

At the Q2 2023 conference call, we elaborated further on the 2023 outlook:

“...so a little bit of color on the earnings outlook. And as you saw, the upgrade was due to better than expected half one group performance and that we do have the most important summer months in Europe behind us, and Asian performance is continuing and you saw our cost control. And having said that, I think there are still many uncertainties out there and you mentioned what are they.

We do – Cees mentioned it before as well is we do still see high inflation in Europe, which may put consumers under further pressure for the half two. And there is, of course, still the impact from the war hanging over us. As much as the remainder of the year becomes smaller, then that’s still hanging over us.

So, there are some risks still out there for half two is one answer to the half two, but it’s also correct that we have some easy comps in China in H2, and the step-up in investments in Vietnam is already in last year’s number. But in that context, we do need to remember that Q4 is a small quarter for China, and that is sort of when you look at the half year development very important.

A few others for the half two. COGS, as I just talked about, are expected to continue to increase, both versus half one and year-on-year. And in certain markets, we will increase investments behind brands to further accelerate premium growth. And we’re also looking into increasing investments behind the capability building elements of SAIL’27. And as I said before, the risk is then hanging over this as well. We had a tough start to Q3, as weather in July in Europe, I’m sure many of you have experienced this, was pretty bad. So, those would be the sort of dampening factors on half two.”
DISCLAIMER
This aide memoire contains forward-looking statements, including statements about the Group’s sales, revenues, earnings, spending, margins, cash flow, inventory, products, actions, plans, strategies, objectives and guidance with respect to the Group's future operating results. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain the words "believe", "anticipate", "expect", "estimate", "intend", "plan", "project", "will be", "will continue", "will result", "could", "may", "might", or any variations of such words or other words with similar meanings. Any such statements are subject to risks and uncertainties that could cause the Group’s actual results to differ materially from the results discussed in such forward-looking statements. Prospective information is based on management’s expectations or forecasts at the time. Such information is subject to the risk that such expectations or forecasts, or the assumptions underlying such expectations or forecasts, may change. The Group assumes no obligation to update any such forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting such forward-looking statements.

Some important risk factors that could cause the Group’s actual results to differ materially from those expressed in its forward-looking statements include, but are not limited to: economic and political uncertainty (including interest rates and exchange rates), financial and regulatory developments, demand for the Group’s products, increasing industry consolidation, competition from other breweries, the availability and pricing of raw materials and packaging materials, cost of energy, production- and distribution-related issues, information technology failures, breach or unexpected termination of contracts, price reductions resulting from market-driven price reductions, market acceptance of new products, changes in consumer preferences, launches of rival products, stipulation of market value in the opening balance sheet of acquired entities, litigation, environmental issues and other unforeseen factors. New risk factors can arise, and it may not be possible for management to predict all such risk factors, nor to assess the impact of all such risk factors on the Group’s business or the extent to which any individual risk factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. Accordingly, forward-looking statements should not be relied on as a prediction of actual results.
